“Off the Chain” – The Drug Supply Chain and Medication Shortages

Session Date: 01/17/2023

Session Time: 11:00 – 11:45 AM (CST)

Target Audience

This continuing education (CE) session was planned to meet the needs of professional staff who deal with the selection and monitoring of medication(s) as part of their patient care duties, including pharmacists, RNs, APRNs, PAs, MDs.

Activity Overview

The stabilization of the drug supply chain is a high priority for national and local organizations across government and healthcare industries. Despite best-practice guidance from leading world organizations, the root cause of drug shortages is widely unknown. The uncertainties in the drug supply chain have led organizations to adopt practices to mitigate the impact of drug shortages on their patients. This presentation will evaluate organizational and national efforts to stabilize the drug supply chain.

Learning Objectives

At the conclusion of this knowledge-based CE session, participants should be able to:

1. Describe the key components of the drug supply chain and the impact of drug shortages
2. Identify common organizational strategies used to mitigate drug shortages
3. Evaluate recent national efforts to stabilize the drug supply chain
